Top Aggies honored at 1991 reunion

Top aggies for the NWSA were honored at the annual alumni reunion held this summer.

Over 300 alumni and spouses packed the UMC Conference Center for the banquet. And most of those people stayed and danced to the music of Herschel Lysaker and the American Legion Dance Band.

Selected as Top Aggies were: Herb W. Schroeder, class of 1931 from Fergus Falls; Dennis D. Warnes, class of 1951 from Morris; and Wayne L. Pedersen, class of 1966 from Urbana, Illinois.

HERB W. SCHROEDER
CLASS OF 1931

Herb Schroeder grew up in Fergus Falls and, following graduation from the NWSA, farmed with his father.

While attending the NWSA, he took courses relating to agriculture because he knew he would eventually take over the family farm, which he did following his father’s death in 1942.

In addition to Herb’s church activities, he was also active in community affairs including: school board, township board (chairperson for 33 years), Farmers Coop Elevator Board, Retirement Pension Trust Fund, Board of Dairy Improvement Association, and 4-H leader.

He was the first farmer to serve on the Fergus Falls Chamber of Commerce, and he organized the West Ottertail County unit of the Minnesota Township Officers Association.

He served on the Board of Directors of Security State Bank, is a stock holder and part owner of KBRF radio station, and is a charter member of Kiwanis International Golden K.

Herb is featured in Who’s Who of the Midwest.

Herb and Esther (Kronemann) were married on June 14, 1934, and they have two sons, Allen and Roger, and six grandchildren.

Herb and Esther moved off the family farm in 1965 and retired in 1972. They have traveled extensively in the United States and eight countries in Europe, plus Algiers, Africa, Mexico, Puerto Rico and other islands.

Herb states, “I dedicate this Top Aggie Award of 1991 in sincere appreciation to the Northwest School in what it has done for me… to give me my education and make possible all of my achievements through the years. The instructors helped me so much to establish leadership and organization qualities, and their words of encouragement gave me a great insight into what I could accomplish.”

DENNIS D. WARNES
CLASS OF 1951

Dennis Warnes is a research agronomist and professor at the University of Minnesota West Central Experiment Station in Morris.

As research agronomist he is responsible for variety testing of all crops grown in west central Minnesota, herbicide trials of major crops, disease and insect trials, crop rotation trials, dates of planting and harvesting forages. He also helps organize the annual Summer and Fall Field Days and Winter Crops Day.

See TOP AGGIES on page 10.
From President Proulx

The reunion was a tremendous success again this year due to the wonderful efforts of the alumni staff, including all the volunteers like Berneil Nelson and Tillie Gebhart and all the rest who helped out. The weather was very favorable adding to the joy of the day. Both the luncheon and the dinner were outstanding thanks to Keith Ramberg and his capable staff. Hersch’s band again performed outstandingly as usual. I want to thank everybody who contributed to the success of the day.

My wife and I were going to dance only a couple rounds and then leave to join some of our children who were at the lake that weekend to visit us. But due to all the wonderful alumni who stayed for the evening, we danced ’til the band quit.

Oh, such is life--wonderful if you take the time to enjoy it!

I want to commend all alumni that took time out to attend. I hope you all enjoyed it.

If you have suggestions for improving the reunion, please feel free to contact us.

I also want to say a big thank you to Allan Larson, our director. Without his much-appreciated efforts the day would not have been a success. Thanks Allan!

Plan now to attend next year’s reunion. And remember you are always welcome to stop for a cup of coffee at our White House Alumni Center.

Allan Larson assumes alumni duties

Allan Larson assumed responsibility for the NWSA alumni this spring, replacing Blake Crosby, who resigned in May to accept a job with Northstar Guarantee Inc. in St. Paul.

Allan is not new to NWSA alumni. He began working for the University of Minnesota, Crookston (UMC) in September of 1988 as director of External Relations. In that position he worked closely with the NWSA alumni.

During the next months Sam Bigger, assistant director of development for the Northwest Experiment Station, will assist in UMC’s development area until final plans are determined regarding the vacancy left by Blake’s resignation.

Aggies may remember Sam as the West Polk County extension director.

Chancellor’s Column

Congratulations to top Aggies Herb Schroeder, Dennis Warnes and Wayne Pedersen, and thanks to the class leaders for getting the folks “out” for the reunion. It was great to see that Northwest School enthusiasm at the banquet.

We are busy with the final touches -- hiring staff, waxing floors, ordering supplies, planning events and activities -- so that this fall will be the best ever on campus. In addition to the physical plant changes (the link project is finally complete or at least useable), there are numerous curricula changes. Faculty have modified courses so that they will transfer more readily; most courses will have the same or similar titles, credits and content to meet requirements for baccalaureate degrees. This should help eliminate surprises if a student were to transfer to a four-year institution.

As you’ve read, funding has been reduced in higher education for the next biennium in Minnesota. The University of Minnesota will have to reduce its budget by $32 million over the next two years. We are in the process of prioritizing programs and activities and will be eliminating some programs and reducing the level of services in some departments. These are difficult yet necessary cuts. At the same time, UMC’s long range planning is to move toward baccalaureate programs. This will be very difficult in light of the present financial status.

However, we plan to continue the process and a major step will be on September 26 when President Hasselmo and four members of the Board of Regents will be visiting campus. On that day, faculty and students will be updating them on campus activities as well as discussing plans for the future.

It’s always a time of change; sometimes it’s just that the dimension is of greater magnitude. Presently, that seems to be the case for UMC. We’ll keep you informed.

Enjoy the fall.

--Donald Sargeant
New student needs lead to new curricula at UMC

Rita Meyer

New student needs lead to new curricula at the University of Minnesota, Crookston (UMC).

"On a survey given to students entering UMC in the fall of 1990, 70 percent of new students listed a baccalaureate degree as their educational goal," said Rita Meyer, vice chancellor for academic affairs.

Meyer presented UMC's "New Academic Directions" proposal to the University of Minnesota Board of Regents.

The changes are being made in response to the UMC students' changing education goals and to the University of Minnesota Initiatives for Excellence in undergraduate education.

To strengthen undergraduate education to facilitate transfer, 115 courses have been revised and strengthened to change content and match course numbers and credit hours. The agriculture division dropped 12 courses and revised 51; arts and sciences dropped 6, added 19, and revised 32; business dropped 14 and revised 21; hospitality and home economics dropped 15 and revised 11.

"The summary of changes clearly demonstrates the centrality of the arts and sciences," Meyer said. "Crookston's curriculum today is much more sensitive to gender and to multi-cultural concerns."

New courses developed for transfer include: Creative Writing, Introduction to Geography, Introduction to Geology, Cultural Pluralism in American History and Introduction to Music.

In the agriculture division all changes facilitate transfer to the University's College of Agriculture; in the arts and sciences division UMC matched the University's College of Liberal Arts numbers, content and credits so that students could successfully transfer to most colleges at the University of Minnesota, Twin Cities; the business division is aligned to programs in regional institutions; and revisions in hospitality facilitate transfer to the University of Wisconsin-Stout.

Part of the success of the proposed changes rests on the collaboration efforts both with the University of North Dakota (UND) and with the University of Minnesota, Twin Cities.

A UND geography professor is working with UMC's arts and sciences division to develop the geography course and will actually teach the course for UMC students. A Twin Cities doctoral student is helping develop the ethics course, and an agricultural professor is working with the geology course.

In supporting UMC's new directions, University President Nils Hasselmo said, "The Crookston campus, in a regional perspective, has a very definite role to play in higher education. The Regents will discuss the future role of the Crookston campus in the months ahead."

A NSWA tradition

Joan Phillips Flaet '41, was recognized for exemplary service to the NSWA Alumni Association for her time and effort she put forth with the White House restoration project. What a beautiful setting to visit with staff and alumni! If you haven't walked through the White House take some time to do so. Thank you, Joan!

Clarence '41 and Edna (Paulsd) Sargent 45 stop at the registration desk to check in with Berneil Nelson.

Clarence '41 and Edna (Paulsd) Sargent '45 brought tradition to the NSWA reunion. Edna's father was one of the first graduates of the NSWA. Julius Paulsd graduated in 1907.

On Clarence's side, all of his brothers and sisters graduated from the NSWA: Edward, Lois, Clarence, Mariam and Mariys.

Offering four-year degrees from UMC is a progressive step, according to Clarence and Edna.

They remember their class motto was "Push on - Keep Moving."

"That's what UMC is doing with its move toward a four-year university," said the Sargents.
Prizes awarded at NWSA reunion 1991

Alum coming the farthest distance
Kathryn Brandli Olson (41), Soldotna, Alaska

Alum coming the farthest distance in the United States (excluding Hawaii and Alaska)
Don LaPlante (39), Hayward, California

Alum coming the farthest distance in Minnesota
Lester Samuelson (46), Albert Lea, Minnesota

Alum with the most children or grandchildren who have or are attending UMC
Allen Gustafson (41), Hallock, Minnesota
William Mosher (56), Red Lake Falls, Minnesota
Pelmer Pederson (41), Mahnomen, Minnesota

Most newly married alum
Gary Odegaard (66), Kindred, North Dakota
Married March 17, 1991

Alumni couple married the longest time to the same spouse
Dan (30) and Alpha Bruun (31) Letnes, Grand Forks, North Dakota
Married December 19, 1933

Alum with the youngest great-grandchild
Antionette DeMaster Agerter (31), Vancouver, Washington

Class leaders needed

Class leaders are needed to help plan the 1992 NWSA Alumni Reunion which will be held Saturday, June 27.

Class leaders are needed for the following classes:

If you are willing to volunteer your time as a class leader, please call the White House Alumni Center at 218-281-6510, ext. 337, or toll free at 1-800-232-6466.

"The NWSA was a very unique school... What made the difference was the people. The alumni had and still have something I call 'Aggie Pride'."

--Wayne L. Pedersen
Class of 1966

There wasn’t enough time to talk for Earl Newhouse ’36, Robert Boucher ’41 and Maxine Hanson ’41.

Lu Nelson, school nurse, and Alpha Bruun Letnes ’31 chat about many memories from the NWSA days.

Adrian van Dellen ’61 and Leelie Tvinneiram Bina ’61 enjoyed the excellent banquet food.

Rose Naplin Salo’s ’33, (from Hibbing) son Mark, came all the way from San Diego to bring Rose and her two sisters to the reunion.
High school students challenged by college

Twenty-three high school students are enrolled to take classes at the University of Minnesota, Crookston (UMC) this fall, according to John Bywater, director of admissions and enrollment management.

Through the Postsecondary Enrollment Options Act, 11th and 12th grade students have the opportunity to study at UMC.

"The purpose of the program is to enhance the high school education curriculum by providing a wider variety of options to high school students," Bywater said.

Gwen Jorgens of Crookston is one of those students enrolled at UMC under the Postsecondary Enrollment Options Act.

Over the past few years, the Jorgens family followed the development of educational opportunities through the Minnesota Legislature. Living in Crookston, open enrollment was not an option for them, but the Post Secondary Enrollment Options Act was an exciting option for their daughter. Gwen met with the admissions staff at UMC to discuss options which would fit into her high school curriculum.

"I was looking for a challenge and realized that it would also be good to have the credits and the experience on my record," Gwen said.

This fall she will begin classes at UMC with American History I, followed by American History II winter quarter and Cultural Pluralism in American History spring quarter.

She is one of 23 high school students already enrolled in college courses at UMC. While most of the students are from Crookston, several are from towns as far away as Princeton, Wadena, Warren, Alvarado and McIntosh.

"Taking classes at UMC has many benefits for me, new and interesting things to learn, new people to meet, and a good preparatory experience for college," Gwen said. "It will also give me a good look at what I will be facing when I leave high school."

"Northwest School"

The following poem was written by Glen Holmquist, class of 1944. Glen, who lives in Nekoosa, Wisconsin, says this is his first contribution to the Northwest School alumni efforts.

Where did you get some learning
And a bit of the Golden Rule
Some alumni give a credit
To a place named Northwest School.

A high school on the prairie
Now has a "memory pool."
Alumni members shrink
From that old Northwest School.

Each June some faithful gather,
"Father Time" will win this duel.
But, it's good to get together
To recall the Northwest School.

Now it is a college
With staff and students "cool."
Farm kids had the best of it,
When it was the Northwest School!!

--Glen Holmquist
written 5-6-91

"The NWSA gave me my education and made possible all of my achievements through the years."

--Herb W. Schroeder

"At the NWSA I received a very good high school and general agriculture education. I wanted to help farmers, so I decided to go to college, planning to be a county agent."

--Dennis D. Warnes
Class of 1951

1956 - Members of the NWSA class of 1956 include, first row, left to right: Arlene Christianson Pickard, Marilyn Hovet Dehnig, Ruth Iverson Mosbeck, Barbara Hylland Lunsetter. Second row: William Moser, Leo Bettels, Donald Diedrich.
“My experience at the NWSA provided me with a solid academic background to enter college and prepared me for the transition from high school to college. But it also taught me how to interact with people.”

--Wayne L. Pedersen
Class of 1966
Keeping “Heritage Alive” important to NWSA alumni

The Heritage Fund Annual Drive was a success again this year thanks to contributions from 671 Aggies.

A major factor that contributed to the success of the fund drive was the time devoted by 35 volunteers who donated time to contact NWSA alumni during the phon-a-thon conducted last spring.

Approximately $21,000 was contributed to the Heritage Fund to support a variety of activities or projects: The AGGIE newsletter, alumni reunions, board activities and expenses, alumni recognition awards, scholarships, stationary and supplies and upkeep of the White House Alumni Center.

It is evident from the number of donors and the dollars contributed that the NWSA alumni have a great deal of pride in their heritage and have a sincere desire to keep the “Aggie Heritage Alive”.

The alumni board and the development staff extend a sincere thank you to all who made contributions to the Heritage Fund. We also wish to extend a special note of appreciation to the following volunteers who so generously devoted time to call other alumni during the phon-a-thon:

JoAnne Straus Carlson ’61
Arline Thoreson Cymbuluk ’48
Donald Diedrich ’56
Dale Finkenbinder ’50
Glen & Marlys Finkenbinder ’55
Phil Hamre ’50

Now, how are we going to carry that piece of homemade apple pie? Top Aggie Herb Schroeder and his wife Esther must have found the solution, because they both enjoyed the pie.
A new look at continuing education

What's new is continuing education at UMC?
UMC is involved in providing coursework, seminars and workshops that are for University credit. We are expanding programs that are available for people in our region.

Interactive television (ITV) coursework which we have expanded significantly this year will continue to grow. We're in the process of providing more services to people in the Red River Basin, northwestern Minnesota and northeastern North Dakota and Manitoba.

How does UMC develop continuing education classes?
Programs are driven by requests, according to Bruce Brorson, continuing education director.

"I don't try to schedule classes I think will go. Rather I try to develop programs that people request. If somebody calls the continuing education office and requests a course, we'll put one together," Brorson said.

Can you give me an example?
First American National Bank of Crookston, and the Bremer banks, visited with us about pulling together a series of seminars that would address communications. Our staff met with bank personnel and came up with a series of three or four courses which addressed communications. We used laptop computers to assist them for routine writing at work, managerial writing and a basic correspondence writing. We're very eager to do those types of things.

Environmental issues are of major concern today. How is UMC responding to this issue?
UMC has a number of science and agriculture people on staff that have worked very hard at the areas of environmental sciences. Some of the courses are: seminars on groundwater and its implications on the environment and how to test groundwater; crop production and ag chemicals; several in the science area.

"The environment is a critical issue, and as we move forward in our programming, we're going to continue to look for opportunities to deliver continuing education to the professionals in our region," Brorson said.

If someone has an idea for a continuing education class at UMC, what should they do?
Give us a call. UMC continuing education's phone number is 218-281-6510, extension 346.

Phoenix Social?
Over 90 alumni and spouses attended the Phoenix social last January.
Plans are underway to access the interest in holding a social in the Phoenix or another area in late January.

If you are interested contact the White House Alumni Center as soon as possible at 1-800-232-6466.

A Letter from Blake Crosby
One of the most difficult issues I had to face as I considered taking this new job was the realization that my contact with Northwest School Aggies was going to end.
You have all heard time and time again that Aggies are a special bunch and indeed you really are! You bring a special attitude to whatever you do. An attitude born by your time as students at the Northwest School.
Your stories, even the ones that may not be quite true, relay your sense of community and sharing and integrity.
It has been my distinct pleasure to have worked with many of you over the past four years -- some of you as reunion class leaders, some of you as alumni board members, some of you as Heritage Fund callers, some of you in other capacities, but all of you as friends.
It was an honor to have you assist, guide, direct and teach me. I hope your time and teaching have given me a little bit of those Aggie attributes I mentioned earlier.
It was a special honor to receive the plaque making me a honorary Aggie. That honor will always hold a special place in my heart.
My very best wishes to each of you.
--Blake Crosby

Georgine and Alton Arness'37 of Fisher met on the dance floor 51 years ago. They try to come to the reunion every summer. This is their style of music.
Top Aggies
Continued from page 1.

Dennis was born on June 14, 1933, in Stephen and grew up on a 160-acre diversified farm about 10 miles northeast of Stephen. In addition, his family rented another 160 acres and raised grain, potatoes and had dairy milk cows, pigs and chickens. Dennis and his four younger sisters all attended the NWSA, as did his father.

After graduating from the NWSA, he received his bachelor of science degree in agronomy from North Dakota Agricultural College (now ND State University) in Fargo, and went on to receive his masters degree from the University of Minnesota, St. Paul. He also has a doctorate degree in plant breeding from the University of Nebraska.

After completing his doctorate, he moved to Morris where he is today. He and his wife Evelyn have three sons and five grandchildren.

Dennis is an active member of First Lutheran Church where he was on the church council and stewardship committee. He is a past president of the Morris Kiwanis Club and was the first chairperson of the Stevens County Genealogical Society. He is also active on numerous University committees. His hobby is genealogy and family history. He has printed and published three books on his family history. Dennis said, "At the NWSA I received a very good high school and general agriculture education. I wanted to help farmers, so I decided to go to college, planning to be a county agent."

WAYNE L. PEDERSEN
CLASS OF 1966

Wayne is a faculty member at the University of Illinois -- Urbana in the department of plant pathology. Before moving to Urbana in 1980, he worked with the Rockefeller Foundation on a research project on powdery mildew of wheat.

His research interests include: genetics of host-pathogen interactions, breeding for disease resistance, crop loss and crop disease modeling, effect of crop management on disease and seed treatments and seedling health.

He received his bachelor of science degree in composite science psychology and his doctorate in plant pathology both from North Dakota State University.

Wayne is a member of the American, Canadian and North Central Division of the Phytopathological Society, American Society of Agronomy and Crop Science Society of America.

He has edited numerous journals related to phytopathology over the past five years.

In 1974 Wayne and Dianne Bungum were married. Wayne recalls that Diane attended his first and last basketball games when he was an Aggie. Both games were at Mentor, her home town, and the Aggies lost both games.

"But she didn’t remember me," he said.

The Pedersens have two children. They are active members of St. Matthew’s Lutheran Church where Wayne has served as deacon of education, superintendent of Sunday school, board of finance, and many other committees.

Wayne said, "My experience at the NWSA has had a definite effect on my career. First it provided me with a solid academic background to enter college. It also prepared me for the transition from high school to college. But it also taught me how to interact with people."

The NWSA was a very unique school… What made the difference was the people. The alumni had and still have something I call 'Aggie Pride.'"

Rossi’s plan to return for 50th

Frank Rossi ’46 and his wife Shirley from Kansas City, Missouri, return every five years for his class reunion. And they plan to be here to celebrate the 50th reunion of the class of ’46 in five years.

Frank grew up in Warroad. To help pay tuition costs, he worked in the fields on John Stromstad’s farm and in the campus dining room.

Frank now performs with a 14-member Banjo Band, a non-profit group which played 170 gigs last year. Donations received from their performances are turned over to the Salvation Army.

Annual board meeting

As part of the business meeting, the following Aggies were elected to the NWSA Alumni Association Board:

Paul Proulx ’46, Pauline Finkenbinder Purath ’45, Donald Mosbeck ’50; James O. Olson ’55, Ardis Overgaard Searles ’51, Glen Torkelson ’48, Marilyn Vesledahl Stromstad ’49, Ken Schuster ’61, William "Bill" Moser ’56, Clarence Sargent ’41, and Berneil Nelson ’42 (Ex-officio).

Special thanks went to: Keith Ramberg, director of dining, for the excellent food and fine service, and to Berneil Nelson, Tillie Gebhardt and Ruth Ann Kruta for arrangements and special help in planning the day’s activities

"The move toward a four-year degree would fill a great need. UMC is so well located and has the facilities."
